

## Products and Services

The MacroPro range provides maintenance levels of potassium on soils in low rainfall areas and works as a starter fertiliser in higher rainfall areas where higher rates of potassium are required or when higher yields occur.

The nutrient requirements of WA crops are increasing and the growing need for potassium in our farming rotations means that MacroPro has an increasingly important fit.

MacroPro Zinc is boosted with zinc for high pH soils or soils prone to zinc deficiency. Zinc should be placed adjacent to the seedling early because it is important for early root development.

### Description

MacroPro Extra, MacroPro Copper, MacroPro Zinc, MacroPro Plus and MacroPro Boost are fully-granulated nitrogen, phosphorus, potassium and sulfur products containing trace elements in every granule. Premium, free-flowing, 2-4mm granules.

### Features

- Fully granulated
- Contains the four major nutrients — nitrogen, phosphorus, potassium and sulfur
- Trace elements in every granule
- Sulfur in sulfate form
- Potassium in the sulfate form (Sulfate of Potash)

### Technical Analysis (%)

#### Advantages

- Easy handling and storage
- Even application
- Can be applied through air seeders
- Supplies the four most limiting nutrients in WA (nitrogen, phosphorus, potassium, sulfur)
- Supplies maintenance rates of trace elements that can be applied annually, particularly in no-till situations
- Good distribution of active trace element sites
- Sulfur is in the plant-available form — important for protein
- Lower salt index than Muriate of Potash
- Provides more sulfur than K-Till range

#### Benefits

- Increased yield potential of crops
- Trouble-free seeding
- Cost-effective way of supplying trace elements — less chance of trace elements limiting yield
- Improved quality of grain
- Safe to sow with the seed

Product	Balanced NPKS Fertilisers						Bulk Density
	Nitrogen	Phosphorus	Potassium	Sulfur	Copper	Zinc	
MacroPro Extra	9.7	11.2	11.2	10.2	0.10	0.20	1.1
MacroPro Copper	11.4	12.0	7.1	10.0	0.33	0.18	1.0
