

Environment Policy

Wesfarmers Chemicals, Energy & Fertilisers operates chemical, gas and fertiliser businesses that service a range of sectors in both domestic and international markets, with a vision to continually improve environmental performance, and hence strengthen its reputation for environmental management.

This policy applies to all businesses within Wesfarmers Chemicals, Energy & Fertilisers. It is a requirement that all people involved in our businesses understand and accept their responsibility to implement this Environment Policy and to be accountable for their actions.

We will manage our activities in a safe and environmentally responsible manner that protects the health, safety and wellbeing of the people we work with, our customers and the communities in which we operate.

We will do this by:

- Continually improving our environmental performance by focussing on being a Safe Person, using a Safe Process and creating a Safer Place.
- Complying with all relevant laws and other obligations.
- Providing products and services to satisfy our customer needs without unacceptable risks to employees, contractors, the community or environment.
- Collaborating with our customers and suppliers to reduce environmental impacts and improve efficiencies along the supply chain and throughout the product lifecycle.
- Actively seeking to minimise emissions from our operations by supporting the principles of resource use efficiency in all aspects of our business.
- Implementing and improving systems to identify, monitor, manage and reduce environmental risks.
- Setting, measuring and working to achieve targets that support ongoing improvements in our environmental performance.
- Supporting the people who we employ or contract to work in a manner that is risk aware through education and supervision.
- Reporting all environmental incidents, hazards and near misses in a timely manner.

Wesfarmers Chemicals, Energy & Fertilisers will strive to protect the environment and create sustainable businesses for future generations.
